

Kelly-Creswell Truck Refurbish

Conversion To Waterborne Combatable Air Spray

- Prior to refurbish this was a 10 year old striper, air spray delivery with carbon steel paint tanks, carbon steel heat exchangers and bleeder style spray guns.
- Replaced paint tanks and plumbing with all stainless steel construction tanks and plumbing.
- Replaced diaphragm loading pump with all stainless steel pumps.
- Replaced heat exchangers with all stainless steel for compatibility with waterborne paints.
- Installed new Nautilus-20 spray guns with exclusive "flush on the fly" system for application of waterborne paints.
- Entire striper repainted.
- Rebuilt bead guns, installed new gaskets on and bead tanks, serviced hydraulic system and air compressor.

- Contact us with basic information on your striper including digital photos and we can then recommend a refurbish program that best suits your equipment and striping needs.
